

## FSC-APAC EUDR Webinar: Navigating Your Compliance Journey in the Asia-Pacific

### BACKGROUND

With the release of the EUDR Country Risk Benchmarking results on 23 May 2025, world markets are categorized as Low Risk, Standard Risk, and High Risk. This classification guides the necessary routes and efforts for compliance with the EU Deforestation-free Regulation (EUDR), which will be enforced in just a few months.

As a key global sourcing and trading hub, companies in the Asia Pacific need to understand the due diligence requirements and the tools available to support their compliance journey.

On 30 September 2025, FSC-Asia Pacific will host the “FSC-APAC EUDR Webinar: Navigating Your Compliance Journey in the Asia-Pacific.” This event will offer timely support and practical guidance for companies operating in APAC, focusing on various commodities and sourcing from countries with different risk designations.

Speakers from FSC International and APAC, Certification Bodies, and companies participating in the Early Adopter Programme will cover essential topics, including Regulatory Module audit requirements, insights from successful business cases, and how to utilize the Centralized National Risk Assessment (CNRA) to meet EUDR Risk Assessment requirements. Additionally, there will be a live demonstration of relevant technologies, including FSC Trace and Risk Hub.
