

FSC 2026 Annual Summit in Taiwan

Deepening Roots, Creating Impact Together

Background

The FSC 2026 Annual Summit in Taiwan will bring together government agencies, FSC members, certificate holders, business partners, and key stakeholders to explore the future of responsible forest management and sustainable forest-based markets in Taiwan.

A central highlight of the summit will be the Ecosystem Services Verified Impact initiative, featuring a milestone MoU signing ceremony and showcasing how FSC's credible verification framework connects forest management, corporate engagement, and local community participation to deliver measurable environmental and social outcomes. With a focus on Taiwan's latest progress, this session will demonstrate how ecosystem services can be advanced in practice through cross-sector collaboration.

The summit will also present key FSC developments in Taiwan and globally, including progress updates, future collaboration directions, and evolving market strategies.

In the afternoon, the program will shift toward business and market applications, exploring how companies can translate sustainability commitments into tangible impact. Aligned with this year's theme of "Deepening Roots, Creating Impact Together", we will also discuss how businesses can leverage the FSC brand, and sustainability efforts in expanding impacts in the local marketplace while bridging to international markets.
